How Much Do You Know About Fire Safety?
Do you know any fire safety rules?

Fire safety rules can help protect your family and home. Let’s learn about a few.

Are you ever around hot things or things that can get hot?

Have a 3 foot “kid-free” zone around the stove when cooking.
There are things inside and outside the home that are hot or can get hot.

Things like hot drinks, soup on the stove, candles and lighters.

You need to know how to stay safe, so you don’t get a **burn**.

Should you stay away from something if it might be hot?
If you are unsure if something is hot, you should stay away from it and check with a grown-up. Things that are hot can burn and hurt you.

Fire safety starts with making good choices:

1. Stay away from hot things
2. If the smoke alarm sounds, get outside and stay outside
3. Call 9-1-1 if there is an emergency

YES! You should call the fire department only if there is an emergency.

The number to call for the fire department is 9-1-1.

A **smoke alarm** will let you know if there is a fire in your home.

You need smoke alarms in your home. It will make a loud “Beep, Beep, Beep” if there is smoke.
You should get out of your home right away and go to your outside meeting place.

Firefighters are community helpers. They will help if there is an emergency. An emergency could be a fire, or it could be someone in your home who is sick or hurt.

Should you call the fire department if there is an emergency?
